

Name _____ Date _____

Teacher _____

1. Describe weathering

2. Describe Erosion

3. What are the two different kinds of weathering?

a.

b.

4. What is sediment?

5. How would you describe a glacier?

Name _____ Date _____ Teacher _____

6. What is the breakdown of the Earth's crust into sediment called?

Weathering

Raining

Erosion

Whooshing

7. What is it called when weathered rock is carried away?

Weathering

Raining

Erosion

Breaking

8. What does physical weathering involve?

Water

Wind

Temperature

All of the above

9. Which of these terms describes the process of acid rain wearing away limestone?

Cryptic erosion

Chemical weathering

Cryptobiotic weathering

Chemical erosion

10. Which of these is an example of erosion

Light shining onto a mountain

Wind blowing away sediment

Rain breaking down rock

All of the above

11. What is the process called when a glacier deposits rocks in oceans and lakes?

Deposition

Despotism

Drainage

Pollution
